

ARYAN SINGHA

Data Analyst | Business Analyst | Operations Analytics

Excel | SQL | Power BI | Reporting & Dashboarding | KPI Tracking | Operations Insights

+91 9039650903 | singhaiaryan45@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Gurugram, Haryana

PROFESSIONAL SUMMARY

Mechanical Engineering graduate leveraging manufacturing experience to transition into Data / Business Analyst roles. Proficient in Excel, SQL & Power BI with hands-on experience building interactive dashboards, analyzing datasets & tracking operational KPIs. Combines engineering mindset with data-driven problem-solving to deliver actionable business insights.

SKILLS

- ANALYTICS & BI** : Data Analysis, Reporting & MIS, KPI Tracking, Dashboarding, Trend Analysis, Business Insights
- EXCEL** : Pivot Tables & Charts, VLOOKUP / XLOOKUP, SUMIFS / COUNTIFS, Data Cleaning, Conditional Formatting, Dashboarding
- SQL** : SELECT, WHERE, ORDER BY, GROUP BY, JOINS, HAVING, CASE WHEN, Subqueries & CTEs, Aggregation & Filtering
- POWER BI** : Data Modeling, Power Query, DAX Basics, KPI Cards, Slicers & Filters, Visual Design
- DOMAIN KNOWLEDGE** : Manufacturing Operations, Industry 4.0 Exposure, Quality & Compliance, Cross-Functional Coordination

PROJECTS

Retail Sales Performance Dashboard | Excel, Power BI

Dataset : Sales Data (9801 Rows)

- Analyzed a 9,800+ row sales dataset across 5+ business dimensions to pinpoint historical performance trends.
- Built an interactive dashboard to track sales, orders, regional/category performance and monthly trends, enabling quick identification of top-performing segments and underperforming areas.

Manufacturing Operations Dashboard | Excel, Power BI

Dataset : Manufacturing Production Data

- Evaluated manufacturing plant datasets to track daily output, downtime and quality trends.
- Developed a dashboard to monitor production output, downtime, quality trends and shift-wise performance, improving visibility into operational bottlenecks and plant KPIs.

SQL Business Analysis | Excel, SQL

Dataset : Supply Chain / Inventory Analysis

- Queried relational supply chain databases to assess inventory movement and track category performance through joins, aggregations and filtering.
- Used SQL-based analysis to identify inventory movement patterns, order trends and category-level demand insights for structured business reporting.

EXPERIENCE

Maxop Engineering Pvt. Ltd. | Gurugram

- Senior Engineer – New Product Development Jul 2026 – Present
 - Tracked NPD project life cycles and cross-functional timelines using milestone data logs.
 - Analyzed project bottlenecks across 3+ internal functions to maintain strict launch timelines.
- Graduate Engineer Trainee – Operations Jul 2025 – Jun 2026
 - Monitored daily production variables and shift KPIs to identify and document floor process constraints.
 - Maintained rigorous operations logs to track downtime anomalies and support weekly trend reporting.

EDUCATION

B.Tech in Mechanical Engineering | UIT-RGPV, Bhopal

June 2025

Minor : Industry 4.0 & Automation

June 2025

CERTIFICATIONS

- HackerRank SQL Badge (5-Star)
